Later Peoples of the Fertile Crescent

If YOU were there...
You are a noble in ancient Babylon, an advisor to the great king Hammurabi. One of your duties is to collect all the laws of the kingdom. They will be carved on a tall block of black stone and placed in the temple. The king asks your opinion about the punishments for certain crimes. For instance, should common people be punished more harshly than nobles?

How will you advise the king?

The Babylonians Conquer Mesopotamia
Although Ur rose to glory after the death of Sargon, repeated foreign attacks drained its strength. By 2000 BC, Ur lay in ruins. With Ur’s power gone, several waves of invaders battled to gain control of Mesopotamia.

The Rise of Babylon
Babylon was home to one such group. That city was located on the Euphrates River near what is today Baghdad, Iraq. Babylon had once been a Sumerian town. By 1800 BC, however, it was home to a powerful government of its own. In 1792 BC, Hammurabi (ham-uh-RAHB-ee) became Babylon’s king. He would become the city’s greatest monarch (MAH-nark), a ruler of a kingdom or empire.
Hammurabi was a brilliant war leader. His armies fought many battles to expand his power. Eventually, he brought all of Mesopotamia into his empire, called the Babylonian Empire, after his capital.

Hammurabi’s skills were not limited to the battlefield, though. He was also an able ruler who could govern a huge empire. He oversaw many building and irrigation projects and improved Babylon’s tax collection system to help pay for them. He also brought much prosperity through increased trade. Hammurabi, however, is most famous for his code of laws.

**Hammurabi’s Code** was a set of 282 laws that dealt with almost every part of daily life. There were laws on everything from trade, loans, and theft to marriage, injury, and murder. It contained some ideas that are still found in laws today. Specific crimes brought specific penalties. However, social class did matter. For instance, injuring a rich man brought a greater penalty than injuring a poor man.

Hammurabi’s Code was important not only for how thorough it was, but also because it was written down for all to see. People all over the empire could read exactly what was against the law.

Hammurabi ruled for 42 years. During his reign, Babylon became the most important city in Mesopotamia. However, after his death, Babylonian power declined. The kings that followed faced invasions from people Hammurabi had conquered. Before long, the Babylonian Empire came to an end.

**READING CHECK**

Analyzing What was Hammurabi’s most important accomplishment?

---

**Primary Source**

**HISTORIC DOCUMENT**

**Hammurabi’s Code**

*The Babylonian ruler Hammurabi is credited with putting together the earliest known written collection of laws. The code set down rules for both criminal and civil law, and informed citizens what was expected of them.*

196. If a man put out the eye of another man, his eye shall be put out.

197. If he break another man’s bone, his bone shall be broken.

198. If he put out the eye of a freed man, or break the bone of a freed man, he shall pay one gold mina.

199. If he put out the eye of a man’s slave, or break the bone of a man’s slave, he shall pay one-half of its value.

221. If a physician heal the broken bone or diseased soft part of a man, the patient shall pay the physician five shekels in money.

222. If he were a freed man he shall pay three shekels.

223. If he were a slave his owner shall pay the physician two shekels.

—Hammurabi, from the Code of Hammurabi, translated by L. W. King

**ANALYZING PRIMARY SOURCES**

How do you think Hammurabi’s code of laws affected citizens of that time?
Invasions of Mesopotamia

Several other civilizations also developed in and around the Fertile Crescent. As their armies battled each other for fertile land, control of the region passed from one empire to another.

The Hittites and Kassites

A people known as the Hittites built a strong kingdom in Asia Minor, in what is today Turkey. Their success came, in part, from two key military advantages they had over rivals. First, the Hittites were among the first people to master ironworking. This meant that they could make the strongest weapons of the time. Second, the Hittites skillfully used the **chariot**, a wheeled, horse-drawn cart used in battle. The chariots allowed Hittite soldiers to move quickly around a battlefield and fire arrows at their enemy. Using these advantages, Hittite forces captured Babylon around 1595 BC.

Hittite rule did not last long, however. Soon after taking Babylon, the Hittite king was killed by an assassin. The kingdom plunged into chaos. The Kassites, a people who lived north of Babylon, captured the city and ruled for almost 400 years.

The Assyrians

Later, in the 1200s BC, the Assyrians (uh-SIR-ee-unz) from northern Mesopotamia briefly gained control of Babylon. However, their empire was soon overrun by invaders. After this defeat, the Assyrians took about 300 years to recover their strength. Then, starting about 900 BC, they began to conquer all of the Fertile Crescent. They even took over parts of Asia Minor and Egypt.
The key to the Assyrians’ success was their strong army. Like the Hittites, the Assyrians used iron weapons and chariots. The army was very well organized, and every soldier knew his role.

The Assyrians were fierce in battle. Before attacking, they spread terror by looting villages and burning crops. Anyone who still dared to resist them was killed.

After conquering the Fertile Crescent, the Assyrians ruled from Nineveh (N-i-nuh-vuh). They demanded heavy taxes from across the empire. Areas that resisted these demands were harshly punished.

Assyrian kings ruled their large empire through local leaders. Each governed a small area, collected taxes, enforced laws, and raised troops for the army. Roads were built to link distant parts of the empire. Messengers on horseback were sent to deliver orders to faraway officials.

**The Chaldeans**

In 652 BC a series of wars broke out in the Assyrian Empire over who should rule. These wars greatly weakened the empire. Sensing this weakness, the Chaldeans (kal-dee-unz), a group from the Syrian Desert, led other peoples in an attack on the Assyrians. In 612 BC, they destroyed Nineveh and the Assyrian Empire.

In its place, the Chaldeans set up a new empire of their own. Nebuchadnezzar (neb-uh-kuhd-NEZ-uhr), the most famous Chaldean king, rebuilt Babylon into a beautiful city. According to legend, his grand palace featured the famous Hanging Gardens. Trees and flowers grew on its terraces and roofs. From the ground the gardens seemed to hang in the air.

The Chaldeans admired Sumerian culture. They studied the Sumerian language and built temples to Sumerian gods.

At the same time, Babylon became a center for astronomy. Chaldeans charted the positions of the stars and kept track of economic, political, and weather events. They also created a calendar and solved complex problems of geometry.

**READING CHECK**  **Sequencing** List in order the peoples who ruled Mesopotamia.
The Phoenicians
At the western end of the Fertile Crescent, along the Mediterranean Sea, was a land known as Phoenicia (fi-NI-shuh). It was not home to a great military power and was often ruled by foreign governments. Nevertheless, the Phoenicians created a wealthy trading society.

The Geography of Phoenicia
Today the nation of Lebanon occupies most of what was once Phoenicia. Mountains border the region to the north and east. The western border is the Mediterranean.

Phoenicia had few resources. One thing it did have, however, was cedar. Cedar trees were prized for their timber, a valuable trade item. But Phoenicia’s overland trade routes were blocked by mountains and hostile neighbors. Phoenicians had to look to the sea for a way to trade.

The Expansion of Trade
Motivated by a desire for trade, the people of Phoenicia became expert sailors. They built one of the world’s finest harbors at the city of Tyre. Fleets of fast Phoenician trading ships sailed to ports all around the Mediterranean Sea. Traders traveled to Egypt, Greece, Italy, Sicily, and Spain. They even passed through the Strait of Gibraltar to reach the Atlantic Ocean.

The Phoenicians founded several new colonies along their trade routes. Carthage (KAHR-thij), located on the northern coast of Africa, was the most famous of these. It later became one of the most powerful cities on the Mediterranean.

Phoenicia grew wealthy from its trade. Besides lumber, the Phoenicians traded silverwork, ivory carvings, and slaves. Beautiful glass objects also became valuable trade items after crafters invented glass-blowing—the art of heating and shaping glass. In addition, the Phoenicians made purple dye from a type of shellfish. They then traded cloth dyed with this purple color. Phoenician purple fabric was very popular with rich people.

The Phoenicians’ most important achievement, however, wasn’t a trade good. To record their activities, Phoenician
traders developed one of the world’s first alphabets. **An alphabet is a set of letters that can be combined to form words.** This development made writing much easier. It had a major impact on the ancient world and on our own. In fact, the alphabet we use for the English language is based on the Phoenicians’, as modified by later civilizations. Later civilizations, including our own, benefited from the innovations passed along by Phoenician traders.

**READING CHECK** **Finding Main Ideas** What were the main achievements of the Phoenicians?

**Summary and Preview** Many different peoples ruled in the Fertile Crescent after the Sumerians. Some made important contributions that are still valued today. In the next chapter you will learn about two remarkable civilizations that developed along the Nile River.

**Section 4 Assessment**

**Reviewing Ideas, Terms, and People**

1. a. **Identify** Where was Babylon located?
   b. **Analyze** What does Hammurabi’s Code reveal about Babylonian society?

2. a. **Describe** What two advantages did Hittite soldiers have over their opponents?
   b. **Rank** Which empire discussed in this section do you feel contributed the most to modern-day society? Why?

3. a. **Identify** For what trade goods were the Phoenicians known? For what else were they known?
   b. **Analyze** How did Phoenicia grow wealthy?

**Critical Thinking**

4. **Categorizing** Use your note-taking diagram with the names of the empires. List at least one advance or achievement made by each empire.

**Focus on Writing**

5. **Gathering Information about Later Peoples** Several different peoples contributed to civilization in the Fertile Crescent after the Sumerians. Which ones, if any, will you mention in your letter? What will you say?
